For troubleshooting support during the webinar, email Jon at jbonkoski@ecotrust.org.

Webinar Goal: to share the final reporting products of the socioeconomic monitoring study of California's commercial and CPFV fishing communities in relation to California's marine protected area (MPA) network.

Agenda

Welcome & Webinar Goals

Introduce project team, walk through the webinar agenda, and confirm anticipated outcomes and outputs.

Brief Project Overview

Provide an overview of the project, including the co-design of key project components in partnership with fishermen, researchers, and agency staff. Reference: [Key Themes/Highlights Summaries from Key Communicator webinars](#)

Final Reporting: Focus Group Perspectives and Key Findings

Walk through the final project website including study results and key findings, and an interactive map layer to convey MPA effects. Group learning and exploration.

Final Reporting: Spatial and Fisheries Data

Provide an overview of Spatial Data Viewer and updated Fisheries Data Explorer. Group learning and exploration.

Final Reporting: Recommendations for Long-Term MPA Monitoring

Summarize the study's recommendations for consideration during MPA monitoring moving forward.

Looking Ahead: Statewide MPA Monitoring Reporting and the MPA Decadal Management Review

Share information about the timing for submitting the final report and how 2019-21 statewide monitoring study results will be considered during the state's MPA Decadal Management Review.

Adjourn

More information is available on the current [MPA Human Uses project website](#), including [focus group summaries](#) and information about [previously held webinars](#) with fishermen, researchers, and resource managers to guide the design of this project.
